

Toyota Sienna Rear-Entry Kneelvan™

ADVANCED ENGINEERING – SUPERIOR SAFETY

FMI's Toyota Sienna Rear-Entry Kneelvan™ with park anywhere rear-entry conversion. Pioneers of the lowered floor rear-entry and backed by 31 years of engineering, an FMI wheelchair accessible Kneelvan™ provides your dealership with a major competitive sales advantage.

- Least intrusive conversion in the mobility industry...maintains original OEM chassis for a smoother ride. (You'll forget it's converted!)
- Reliable hydraulic driven ramp and kneeling system powered by marine grade hydraulics, the same technology used in heavy duty machinery and aerospace industry.
- Reinforced tubular steel lowered floor (reverse roll cage design) adds an additional layer of safety. The same design used to protect race car drivers during rollover.
